

Configure, Deploy & Manage Securely

Key Features

- View & Configure Device
- Analytics & Dashboards
- GPS Based Location Service
- Monitor Device Health
- User Groups & Permission
- Reports & Alerts
- 3rd Party Device Integration

Monitor your IoT products with end-to-end visibility for total oversight, control and centralized management with security. Experience unprecedented ease and efficiency in IoT device management. From deployment to monitoring and troubleshooting, the end-to-end cloud solution helps you achieve more with less effort.

Secure

AWS Hosted
Multi Region Backup
OS Level Security

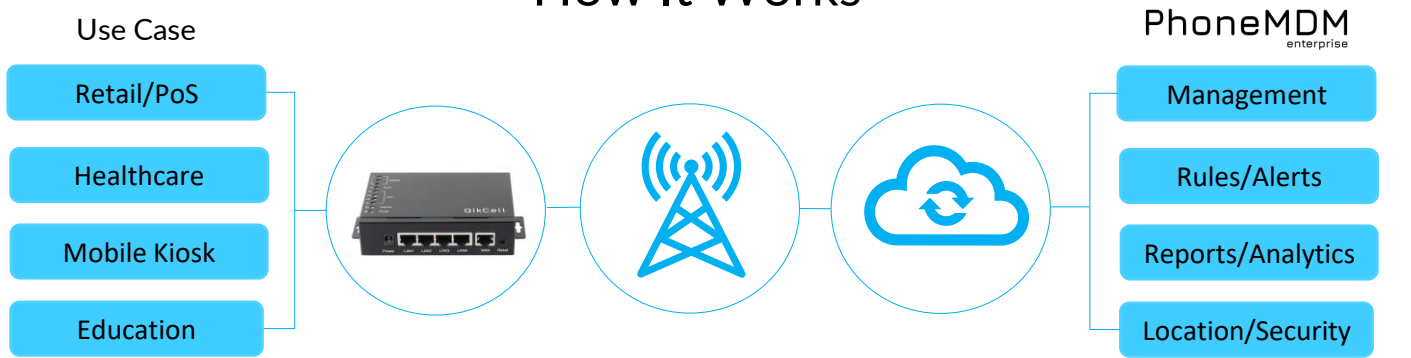

Valuable
